

Colette Moreira-Henocq– Co-Chair of Eastern Collaborative Children's Residential Network

I have worked within the health and social care sector since I was 17 and have a passion for improving the lives of those around me. During my career, I have worked with adults, children and young people. I completed a master's degree with a focus on behaviour as a form of communication, where I developed the skills to interpret behavioural cues and deliver supportive, nurturing interventions. I completed my Level 5 in leadership and management of adult, young people and children's settings, and went on to join a private residential children's home company.

I am currently a registered manager for a dual placement EBD setting, and I hope to become dual registered soon. I am passionate about awareness, knowledge and improvement in the sector, and will strive to support innovation and development to enable children and young people to have improved outcomes for their wellbeing.
